## What is Cisco?-[Networkers Guru](#)

First, in this article, we cover all Basics of Cisco Certification, it is considered as a world leader in terms of design and manufacture, and even the sale of networking equipment. It is a well-known system that is usually used by many professionals who believe in the power of certifications and trainings.

## What do you need to Know about Basics of Cisco Certification?

Let us find out how Basics of Cisco Certification helps many professionals in surpassing their challenges every single day. The main requirement that is needed in order to get a Cisco Certification is passing its exams and training such as CCNP Training, CCNA Training, and CCIE Examination Certification. After doing so, the person must affix his or her signature on the Confidentiality Agreement. When passing all the exams given by Cisco, a person proves to everyone that he or she got the networking expertise and knowledge that would give him or her edge to all the other professionals in the world.

### What is it Like Taking the Exam?

- All Cisco Exams are led by proctors. It is timed and is given in a secure environment. Almost all of the examinations given are lasting from one to two hours, except for the lab exams that are lasting for eight long hours.
- All exams are tough and definitely challenging. There is an Exam Tutorial that is provided for those who take the test in order to guide them simply in multiple question formats.
- Examinees are given an erasable note board and a marker in case they need to do some calculations or note-taking.
- The cost of each exam varies from one country to the other. It also varies from the kind of certification you want to earn. You have to inquire about the costs once you are determined to take the exams. Costs may change from months after months.

If you think that you are ready to take the exam, you have to make sure that you schedule it beforehand. Get ready with all the requirements needed and plan ahead. If you are taking the exams in Canada or United States, it can be scheduled six weeks prior to the exam date, so you have better chances to study and plan for the exam. For those who have not been lucky enough to pass the exam, they are given the chance to retake the test within a given period of time. This is why it is really important to take advantage of your experiences and learn from it because most of the items on the exams are based on what people experience daily.

These are just a few basics of getting the certification from Cisco. For sure, there is still a lot to
