CCIE SECURITY INTEGRATED TRAINING PROGRAM, COURSE FEE, EXAM, JOB PLACEMENT COURSE

CCIE Security Integrated Training Program

Cisco certifications have been the most honoured one among the networking professional in the industry over the years, partly because of the companies growing impetus in the field and continual development and innovation. Professional certified in their technology career tracks are much more respected compared to their other counterparts.

Cisco Certified Internetworking Expert certification is one of the most sought-after credentials to own, and the professionals holding those credentials are well respected in the community.

The certification path has been simplified as per each technology requirement, and are listed as follow:

- CCIE Routing and Switching

- CCIE Security

- CCIE Collaboration

- CCIE Service Provider

- CCIE Wireless

- CCIE Datacentre

Among all these certifications, the most sought after are [CCIE Routing & Switching](#), [CCIE Security](#) & [CCIE Collaboration](#).

CCIE Security Integrated Course Training Program

[CCIE Security Integrated Training Program](#) takes into account that the candidate has the expertise of both the theoretical as well as the practical aspects of the entire network infrastructure technology.

Keeping this in mind, Networkers Guru created an integrated training program that comprised of basic courses like CCNA R&S until CCIE Security. This ensures that the candidates are well trained and has a well-developed understanding of all aspects of the security infrastructure.

The program comprises of the following individual courses:

CCNA R&S ->CCNA Security->CCNP Security ->CCIE Security

Candidates preparing towards CCIE certification prefer this program as they seek to establish themselves as the industry expert in implementing, managing and maintain security infrastructure. Professionals who have been certified in this certification path are capable of planning infrastructures as per the need of the industry using Cisco security solutions and technologies. The certification program is seen as the ultimate challenge in managing end to end network security.

World's Most innovative and effective CCIE Training model, it has 8 hours rigorous training session consisting of Theoretical classes + Practical Classes + Personality Development.
