How are students managing their advanced level study along with board exams?

Career opportunities are highly prevalent in the recent years. People have unlimited options to pursue. But everything requires a good amount of preparation over an elongated time period. There is no space for a shortcut.

What are the viable career opportunities in computer networking?

Among many, IT has quite a good scope in the recent times. All the software giants are offering good placements for the students. If you scroll through the latest news, then you must be aware that Apple is coming for campus placement at a college in Hyderabad.

Networking plays a crucial role in IT. There are many students who aim to be a network engineer. The field has got some good scope for every person as it requires skills, knowledge, and experience.

Some of the range of work that networking offers are:

- **Network specialist**
- **Network technician**
- **Network analyst**
- **Network engineer**
- **Network solutions architect**

A person mastering the art of networking technology can work in any of the following positions mentioned above.

How to take preparation for excelling in Computer networking field?

The field of networking demands a robust preparation to do well. Before joining any such institutes, students are doing self-study at home. This is an effective way to pursue knowledge before classes begin. There is no harm if you already know the basics before joining college; it will help you to learn faster.

You will notice that pupils who are still stuck with their upcoming board exams have already started their preparation. How do they do it? Let's highlight some ways and subways of preparation at the first stage

1.Prepare well from tutorials available online:

You must have an unlimited amount of internet back at home. Make a good use of it by downloading tutorials from some specific sites and read it in your free time. This will help you to have a very clear idea about the domain and also how it functions.

2.Watch videos:

YouTube is not only meant for watching the trailer of Padmavati for more than ten times. Do watch some important videos related to routing and switching. It will help you to visualize the practical work.

3. Consult your seniors- This is actually productive in terms of choosing an institute and also jobs. If you know someone who is working or doing well in this field then do take suggestions and apply it. Don't try to do anything without an advice from your senior.

4.Always choose the best place for admission:

There are several institutes providing courses on networking. But hardly can you depend on all for a good placement opportunity. Here, [Networkers Guru](#) is a recommended choice for all students and even industry experts. The institute provides the best learning experience and also offers good placement in every course.

Advance preparation is not a bad thing rather a good sign of having an interest and an urge to do well. But don't take your board exams for granted while preparing for your next step. Always maintain equilibrium between the two.
