
Cisco Certification Course Gateway to professional networking certificate

Cisco Certification Course | Networkers Guru | Cisco [CCNA](#) [CCNP](#) [CCIE](#) Training Institute

Networking in today's digital age has become a priority and many people have shown enthusiasm and interest in learning networking and getting a professional degree. However getting a professional degree requires a great deal of interest in the subject matter and a perfect place to get your degree. This is where the offered by Cisco Certification Course, the leading networking giant helps you out.

Cisco Certification Course Training- [Networkers Guru](#)

Cisco Systems, Inc. has been offering a different level of **Cisco Certification Course** to individuals. An individual can have a certification in either or all of the five levels of Cisco Certification Course namely, the Entry level, the Associate level, the Professional level, the Expert level and the Architect level. The levels are listed according to their difficulty and level of recognition i.e. from basic to expert.

Each certification has a different number of examinations to be taken. The Entry level has two exams; CCENT and CCT, the Associate level has CCDA exams for network designing and CCNA exams for network installation. The CCNA further has eight certifications; CCNA Routing and Switching, CCNA Data Center, CCNA Security, CCNA Service Provider, CCNA Service Provider Operations, CCNA Video, CCNA Wireless and CCNA Voice.

Again the Professional level has CCDP and CCNP exams where the CCNP exam is further divided into seven sub exams. Moving on further the expert level offers CCDE and CCIE exams where the CCIE certification exam is again further divided into nine sections. And finally, the Architect level offers the CCNA exam which is the highest accreditation achievable from Cisco Certification Course.

Cisco Certification Course is continuously meeting the Industry requirement

The Cisco Certified Network Associate Voice (CCNA Voice) is one of the exams to be taken from the associate level. It tests for the skills required in specialized job roles in voice technology such as voice manager, voice engineer, and voice technologies administrator. The exam tests the skills in VoIP technologies. Any individual wanting to take the **CCNA Voice** exam must have Cisco Certification in either CCENT or CCNA Routing and Switch or any Cisco CCIE certification. As about the test center, the candidate has to find a test center who works with Pearson VUE.

For the preparation of CCNA voice exam, an individual can browse the Cisco's official website

or can get learning materials online. As like all other exams, the candidate appearing for the CCNA Voice exam also has to take a two-hour examination which will consist of 90-110 questions in average. The questions can be a combination of multiple choice or interactive structural questions that access the technical knowledge of the candidate. The candidate who will succeed in the written examination will have to take a lab examination where candidates should solve a series of complex network related problems.

The CCIE certification exam has the most prestigious recognition all over the world. So if you want to take the Cisco CCIE certification exam then you may want to take the CCIE training program from the Cisco itself or get a training center. You can easily find the places to take the CCIE training classes over the internet.

Hence after get the [Cisco Certification](#) anyone can get recognition all over the world and getting a job will not be a herculean task.
