There are people who are interested in knowing the history of **Cisco Certification Online Classroom**. Who are the founders of this system? When was it introduced to the public, and so on? Let us take a look at how it all started.

The History of Cisco-Networkers Guru

Cisco Systems was founded in December of the year 1984. It is a multinational American Company that was founded by two married couples namely Leonard Bosack and Sandy Lerner. Leonard was more into computer science and its computers while Sandy is the ones who manage the computers from the Graduate School of Business. They were both employed at Stanford University based in San Fransisco, California.

How They Got The Name

Many people knew from the very start that the word "cisco" came from the word "Fransisco" which is the place where both founders are working. The system is the very first that built the multi-protocol router that is multi-purpose. There is a great help from this system as it is the bridge to connect one incompatible computer to the other.

After creating several router series each time passes by, they made sure that it is enhanced every now and then, and that they stay updated most of the times. They are considered as the leader in networking on the Internet. The products that are released by the company bring simplicity in transferring and delivering information despite the differences in place, time and platform. Aside from that, there are multiple hardware products that Cisco is now presenting to the public.
