# How To Crack CCNA Exam

## How To Crack CCNA Exam In The First Attempt

CCNA abbreviated for Cisco Certificate Networking Associate is one of the reputed exams taken by individuals who are aiming to commence their networking certification paths in the technology arena. Hence, How To Crack [CCNA](#) Exam In The First Attempt is the most prominent question. Recent graduates and professionals undertake this test to highlight their proficiency and knowledge in the field of technology. The certification path is then followed by other professional and expert levels certifications like [CCNP](#) and [CCIE](#).

**CCENT > CCNA > CCNP > CCIE**

Alternatively, individuals either can choose to pursue the entry-level CCENT and then go for CCNA exam or can go for CCNA directly after undertaking sufficient training and practical experience.

With proper curriculum and training, individuals can easily crack the CCNA exam in the first attempt itself. Timely training schedule, practice, and [guidance](#) are all one needs to clear the certification exam.

### Syllabus

Make sure to go through the syllabus of the current CCNA exam i.e. 200-125, since the syllabus is relevant to the exam code. Different exam codes tend to have a change in syllabus.

---

## Know Your Exam

It is highly advisable to have pre-knowledge regarding the certification path you will be choosing to follow. Namely, if you choose to go for CCNA [Routing & Switching](#), CCNA [Security](#) or CCNA [Collaboration](#) since each opens certification path to a different certification path for technologies.

CCNA R&S mainly focuses on the routing and switching technologies and infrastructure that are used in the industry.

CCNA Security aims at security devices and environment that help to secure commercial technology infrastructure.

CCNA Collaboration helps an individual to be aware of the implementation of multimedia services and infrastructure in a commercial setting.

## Before the Exam

Plan your exam prior, this helps you to schedule your training options and book your exam as well as allot time for your practice sessions. One has to take care of multiple aspects while planning your exam; a few of them are listed below:

### Training: Opt For Training As Per Convenience

a) One can pursue training using the official [CISCO](#) material available on the site as a part of their training kit; this is very helpful for self-study. The simulation lab software can be used to study the practical aspect of the study material.

b) Alternatively, one can enroll in one of the training institutes that help the individual by providing real-life infrastructure and lab environment, which enable individuals to learn and

---

understand things more effectively. Make sure that institute is a certified Cisco Partner.

### **Get Well Versed With The Exam Format**

- a) CCNA exam is conducted in two formats; an individual can select to pursue either two exams of ICND-1 100-101 and ICND-2 or a single exam of CCNA 200-101. Decide your prior path.
- b) The exam is conducted in the form of 50 Q's to be answered in 90 min and the questions are asked are scenario bases, multiple options or single scenario based.

### **Resources & Practice**

- a) Go through dumps and previous questions to understand the exam question patterns and formats well. Institutes are capable for helping individuals more by providing them updated dumps and training sessions.
- b) Opt for mock tests to get habituated with the exam.
- c) Consider focusing for lab-based or scenario based questions, since they take more time while solving. Make sure of packet tracer or GNS3 for practicing lab questions.
- d) Practice, Practice & Practice; clearly, there is no alternative to this.

### **Book Your Exam**

Book your exam, as and make sure to make the payment for the exact exam code that you will

---

be preparing for. Either also, you can take an exam at your place of convenience or you can book your exam with Pearson Vue which is the global exam partner of Cisco for a proctored base environment.

Take a two days break before your exam date, this will help you to relax and prepare well for the exam session.

## On Exam Day

Reach the test center with all required documents on time. The proctor will help you out settling in and will arrange the setup. You can complete your test and the result will be shown to you promptly. You will be delivered the certificate number by a soft copy or by Mail if you insist on a hard copy.

With practice, effort, and professional guidance, the CCNA exam can be easily cracked down in a single attempt without stress.
